SUMMARY

Innovative and proactive front-end developer with a passion for crafting elegant web applications for demanding clients. Proven ability to effectively manage time, organize tasks, and translate ideas into desired results. Thrives in both collaborative and independent environments, leveraging strong problem-solving, analytical, and interpersonal skills.

WORK EXPERIENCE

- Aug 2024 - Aug 2024
Please provide me with the text you want me to summarize into a five-line professional experience description. I need the details of your experience to create a concise and ATS-friendly summary.

PROJECTS

Fully Responsive Modern UI/UX GPT3 Clone

[Link to Demo](#)

Developed a fully responsive, modern UI/UX GPT-3 clone website using React. This application, integrated into Microsoft products, facilitates the translation of natural language into formal computer code.

Weather Dashboard

[Link to Demo](#)

Developed a user-friendly weather dashboard application providing real-time weather updates, hourly forecasts, and accurate climatic information. The application displays both day and night weather conditions, enhancing user awareness of environmental changes.
