SUMMARY

Proactive front-end developer with a passion for technology, specializing in crafting elegant web applications for discerning clients. Highly skilled in time management and task organization, adept at translating ideas into functional results. Thrives in both team and independent settings, demonstrating strong problem-solving, analytical, and interpersonal abilities.

SKILLS

- React.js
- Angular.js
- JavaScript
- Typescript
- HTML
- CSS
- Tailwind CSS
- Redux, ReduxToolkit
- GIT,GitHub
- Firebase

PROJECTS

MakemyTrip demo [🔗](#)

Developed a travel booking website inspired by MakeMyTrip, allowing users to search and book flights, hotels, and holiday packages. Implemented features for searching and booking flights, hotels, and holiday packages with a user-friendly interface. Integrated Firebase for authentication and real-time database management. Ensured a fully responsive design for smooth navigation across devices. Optimized performance for fast loading and enhanced user experience. Focused on clean, reusable code and best development practices.

Weather Dashboard [🔗](#)

Developed a real-time weather dashboard application providing accurate hourly updates. The application displays both day and night weather conditions, ensuring comprehensive weather insights. This project leverages user-friendly interfaces to deliver a seamless experience. The application is designed for both web and mobile platforms, catering to diverse user needs. My contributions included crafting the user interface, integrating weather data APIs, and optimizing the application for performance.

Personal Portfolio [🔗](#)

"My portfolio showcases a range of innovative web projects built using React.js, JavaScript, and modern frontend tools. It highlights my ability to create responsive, user-friendly interfaces and features clean, minimal design. Explore my work, including real-time weather apps and GPT-3 integration, to see how I craft seamless web experiences. Let's connect and collaborate on exciting development projects!"
